Foreword

TO THE TRADE:

We take pleasure in presenting our 1933 contract and general trade list.

An institution grows as it is capable of serving well its many customers: WE serve the discriminating trade what they demand: MERIT FLOWER SEEDS.

We are justly proud of the esteem and favor our stocks have attained, and devote all our energies to the perfecting of strains and the breeding up of new varieties.

We extend to the seed trade a most cordial invitation to visit our experimental and trial grounds and our extensive ranches, and personally acquaint themselves with the purity of our cultures.

We again welcome the opportunity to thank our patrons for their generous support in the past and will do our utmost to justify their continuance.

GENERAL CONDITIONS OF DELIVERY

For every order, we agree to plant sufficient land to produce the desired quantity of seed under normal conditions.

Should the outcome of the crop be lower than our estimation, orders will be filled pro rata only.

Crop failure or any other cause beyond our control releases us entirely from delivery.

We give no warranty, express or implied, as to description, purity, productiveness, or any other matter of any seeds we sell, and we will not be in any way responsible for them.

TERMS

All seeds are quoted f. o. b. Guadalupe, California, for delivery after harvest crop of 1933, 60 days acceptance net, less 2% cash thirty days.

All overdue accounts subject to sight draft without further notice.

Bags and containers will be charged at cost and are not returnable.

While we are confident prices given in this catalog are very reasonable, we shall be pleased to have the opportunity of meeting any reasonable competition of houses of repute.

We reserve the right to change prices in this list at any time.

NEW ANNUAL CANTERBURY BELLS **BRING SPRING TO THE GARDEN IN SEPTEMBER**

Many years of careful selection have at last given us an Annual Canterbury Bell which blooms from seed in less than six months. It should now be possible to have this beautiful flower in bloom at almost any time of the year. The plant grows from two to two and a half feet tall, each plant having from six to eight spikes of blooms. **Seed Planted in February Blooms in July.** We offer this in mixture, containing the following colors: dark blue, light blue, pink, rose and white. We believe this to be a very fine novelty and that it will fill a long felt want. Price per oz. \$1.50, per $\frac{1}{4}$ lb. \$4.50, per lb. \$15.00.

NEW VERBENA BEAUTY OF OXFORD HYBRIDS

Hybrida Grandiflora Type. Old English Name, Vervain.

A beautiful giant hybrid raised from a cross between Verbena Luminosa and Beauty of Oxford. While following closely the color of Beauty of Oxford, it also inherits a touch of salmon pink from Luminosa which gives a lovely softening effect to the sometimes harsh coloring of Beauty of Oxford. The color shades from clear Rose-Pink to Rose-Red, making this the brightest Rose Verbena ever produced from seed.

The individual florets measure over one inch in diameter. They are half as large again as Beauty of Oxford and will easily cover a silver half dollar. The foliage is a dark cress green.

This beautiful Verbena will be welcomed as a distinct addition to the Verbena Grandiflora color group and also for the opportunity to produce from seed those color effects only obtained previously by cuttings of Beauty of Oxford. Price per oz. \$1.50, per $\frac{1}{4}$ lb. \$4.50, per lb. \$15.00.

NEW CANDYTUFT MINIATURE GEM

(Hyacinth Flowered Type)

The result of years of selection has produced a dainty, small miniature hyacinth flowered Candytuft about three and a half inches high, each plant producing four to six spikes. A perfect Miniature Gem for the rock garden. Price per oz. \$0.50, per $\frac{1}{4}$ lb. \$1.50, per lb. \$5.00.

NEW LUPINUS HARTWEGII GIANTS MIXED

A new improved strain of Annual Lupines. Hartwegii Giants are from three to four feet tall or one to one and a half feet taller than the Lupinus Hartwegii type.

Hartwegii Giants have the base branching habit, with four to six long spikes to a plant. Each spike has from twenty-five to fifty more blooms than the Hartwegii type. The blooms are also a little larger. The leaves are about one and a half times as large, making a very handsome plant. Colors include dark blue, sky blue, rose and white. We feel confident that this new strain will increase the popularity of this fine Annual Lupine, so easily and quickly grown from seed. Price per oz. \$0.50, per $\frac{1}{4}$ lb. \$1.50, per lb. \$5.00.

NEW STOCK EARLY GIANT IMPERIAL SHASTA

A New Giant White Stock, one and a half times as tall as Imperial White, with longer stems and larger blooms and more blooms to the stem. SHASTA is a giant, vigorous, robust, glistening White Stock, producing a very high percentage of doubles. A good White has long been wanted and we are pleased to be able to introduce this magnificent variety. Price per oz. \$2.50, per $\frac{1}{4}$ lb. \$7.50, per lb. \$25.00.

NEW STOCK EARLY GIANT IMPERIAL BUTTERCUP

A New Giant Yellow Stock of a richer deeper tone than Imperial Canary Yellow; a far better habit, throwing long spikes well covered with larger blooms. Altogether a decided improvement over any other Yellow Stock that we have ever grown. The percentage of doubles is exceptionally high. Price per oz. \$2.50, per $\frac{1}{4}$ lb. \$7.50, per lb. \$25.00.

NEW EARLY FLOWERING SWEET PEA ANNIE LAURIE

constitutes the richest tone of pure Rose-Pink ever produced in a Sweet Pea. It is several shades richer than Majestic Rose or Zvolanek's Rose, and is a marvelous improvement over these two varieties.

Reports received from the trade who have already grown ANNIE LAURIE on trial, declare it is just the color the florists want. In the trials and in the field cultures, it shows up as the most vigorous Sweet Pea we have ever grown. Long Stems which are maintained throughout its blooming period, and Fours of course, and it is an abundant, prolific and continuous bloomer. Price per oz. \$0.50, per $\frac{1}{4}$ lb. \$1.50, per lb. \$5.00.

THE LEGEND OF THE CANTERBURY BELL

Long, long ago, in the Cathedral at Canterbury, the Shrine of Thomas A'Becket used to be covered with a velvet canopy covered with many small silver bells. The raising of the canopy and the tinkling of the bells gave notice to pilgrims scattered about the Cathedral that the service was about to commence. The resemblance of the blooms of Campanula Medium to these small silver bells gave them their well known name of Canterbury Bells.

NEW ANNUAL CANTERBURY BELLS (Waller-Franklin)

Bring Spring to the Garden in September.

Many years of careful selection have at last given us an Annual Canterbury Bell which blooms from seed in less than six months. It should now be possible to have this beautiful flower in bloom at almost any time of the year. The plant grows from two to two and a half feet tall, each plant having from six to eight spikes of blooms. Seed planted in February blooms in July. We offer this in mixture, containing the following colors: dark blue, light blue, pink, rose and white. We believe this to be a very fine novelty and that it will fill a long felt want.

Price per oz. \$1.50, per ¼ lb. \$4.50, per lb. \$15.00.

LUPINUS

NEW LUPINUS HARTWEGII GIANTS MIXED (Waller-Franklin)

A new improved strain of Annual Lupines. Hartwegii Giants are from three to four feet tall or one to one and a half feet taller than the Lupinus Hartwegii type.

Hartwegii Giants have the base branching habit, with four to six long spikes to a plant. Each spike has from twenty-five to fifty more blooms than the Hartwegii type. The blooms are also a little larger. The leaves are about one and a half times as large, making a very handsome plant. Colors include dark blue, sky blue, rose and white. We feel confident that this new strain will increase the popularity of this fine Annual Lupine, so easily and quickly grown from seed.

Price per oz. \$0.50, per ¼ lb. \$1.50, per lb. \$5.00.

EARLY FLOWERING SPENCER SWEET PEAS

Our Early Flowering Sweet Peas are especially grown for culture under glass. They are equally desirable for growing out of doors.

ANNIE LAURIE (NEW) (W-F)

constitutes the richest tone of pure Rose-Pink ever produced in a Sweet Pea. It is several shades richer than Majestic Rose or Zvolanek's Rose, and is a marvelous improvement over these two varieties.

Reports received from the trade who have already grown Annie Laurie on trial, declare it is just the color the florists want. In the trials and in the field cultures, it shows up as the most vigorous Sweet Pea we have ever grown. Long Stems which are maintained throughout its blooming period, and Fours of course, and it is an abundant, prolific and continuous bloomer. Price per lb.....\$5.00

COLOR CLASSIFICATION

In view of the numerous Sweet Pea introductions, it seems necessary to set up a classification according to color.

Every year we make careful color comparisons of the older varieties and the latest introductions and are in an eminent position to judge their respective merits.

We now take pleasure in submitting a color classification of the Standard Spencers.

The variety we consider best in each color class is indicated by an asterisk (*). The most up-to-date varieties are in heavy type.

VERBENA HYBRIDA GRANDIFLORA

A magnificent strain of Verbenas, of robust compact habit and free blooming. The trusses are immense, the individual florets measuring an inch in diameter.

NEW VERBENA BEAUTY OF OXFORD HYBRID (W-F)

A beautiful giant hybrid raised from a cross between Verbena Luminosa and Beauty of Oxford. While following closely the color of Beauty of Oxford, it also inherits a touch of salmon pink from Luminosa which gives a lovely softening effect to the sometimes harsh coloring of Beauty of Oxford. The color shades from clear Rose-Pink to Rose-Red, making this the brightest Rose Verbena ever produced from seed.

The individual florets measure over one inch in diameter. They are half as large again as Beauty of Oxford and will easily cover a silver half dollar. The foliage is a dark cress green.

This beautiful Verbena will be welcomed as a distinct addition to the Verbena Grandiflora color group and also for the opportunity to produce from seed those color effects only obtained previously by cuttings of Beauty of Oxford.

WALLER-FRANKLIN FORMULA MIXTURES

As the result of years of experimenting, our research department has perfected certain color blends of various mixtures.

These mixtures were subject to the criticism of visiting seedsmen for several years and when unanimously approved were considered MASTER FORMULAE.

Mixtures grown from these Master Formulae are listed in this catalog as "WALLER-FRANKLIN FORMULA MIXTURES."
